

AVITUUC

**The One-Stop-Shop for your
Audio-Visual and ICT needs!**

SUSTAINABILITY AND CIRCULAR ECONOMY

At AVITUC, we are deeply committed to sustainability and fostering a circular economy in all aspects of our business. We believe in creating meaningful impact by extending the lifecycle of technology and reducing e-waste. Our innovative approach focuses on finding new homes for old devices, ensuring they continue to serve a purpose rather than becoming waste. By reinstalling and donating refurbished equipment to schools and organizations that need them, we help bridge the digital divide and empower communities. Additionally, we work to recycle and recondition laptops, providing much-needed resources to humanitarian efforts, including asylum seekers in Ireland and those affected by the war in Ukraine.

Our five-year "Product as a Service" (PaaS) program exemplifies our dedication to extending the lifecycle of equipment and minimizing environmental impact. By offering this all-inclusive service, we ensure devices remain functional, reducing the need for constant replacements and helping businesses and individuals alike reduce their carbon footprint. Sustainability is not just a goal for AVITUC—it's a commitment to doing our part for the planet and future generations.

KEY SUSTAINABILITY COMMITMENTS

- **Device Reuse:** Reinstalling old devices in schools and underserved communities to extend their use and provide access to technology.
- **Humanitarian Contributions:** Reconditioning laptops for asylum seekers in Ireland and those impacted by conflict, including donations to Ukraine.
- **Lifecycle Extension:** Offering a five-year "Product as a Service" (PaaS) program to reduce the frequency of equipment replacement.
- **E-Waste Recycling:** Ensuring responsible recycling of old equipment to minimize waste and environmental impact.
- **Carbon Footprint Reduction:** Actively working to reduce our emissions and promote sustainable practices across all operations.

ABOUT US

AVITUC stands for **A**udio-**V**isual, **I**nformation **T**echnology, and **U**nified **C**ommunication. AVITUC is located in Dublin, on trend with the latest audio-visual innovations; supplying cost-effective, easy-to-use solutions to the education sector nationwide.
